Address: Türkiye (Home)

● DRIVING LICENCE

Driving licence: B | 06/07/2021 - 06/07/2031

● EDUCATION & TRAINING

19/09/2021 - 26/06/2025 - ANKARA, TÜRKİYE

BACHELOR'S DEGREE IN MANAGEMENT INFORMATION SYSTEMS- BASKENT UNIVERSITY

Information systems management, software development, database management, programming, systems analysis and design, business process analysis, data analysis, web and mobile application development, IT project management, enterprise resource planning (ERP), computer networks.

Level in EQF: 6

● WORK EXPERIENCE

01/07/2025 - CURRENT - ANKARA, TÜRKİYE

SOFTWARE DEVELOPERTEKNOPAR INDUSTRIAL AUTOMATION

- Backend development and maintenance of enterprise MES software using Java and Spring Boot.
- Design and development of RESTful APIs and integration of backend services with frontend applications and external systems.
- Frontend development using Next.js and implementation of responsive, user-friendly interfaces and data visualisation components.
- ERP integration and development of data exchange and communication mechanisms between MES and ERP systems.
- Database design, SQL development, data management and optimisation of application-related database operations.
- Containerisation and deployment of applications using Docker and management of development and deployment environments.
- Development and integration of AI-powered chatbot solutions using Large Language Models (LLMs) to support intelligent interaction with enterprise systems and data.
- Analysis of business requirements, software design, debugging, testing, maintenance and continuous improvement of enterprise applications.
- Collaboration with development and business teams throughout the software development lifecycle.

03/02/2025 - 27/06/2025 - ANKARA, TÜRKİYE

SOFTWARE INTERNTEKNOPAR INDUSTRIAL AUTOMATION

● SKILLS

Backend Development | REST Client, SOAP, REST API | SQL | PostgreSQL | React/Next.js | JavaScript | Git/Github, Docker, Gitlab | ERP Integrations | Large Language Models (LLM) | Creating a chatbot | Define Technical Requirements | Analyse Software Specifications | Project Management | Metodologii Agile Scrum | Java/Spring

● PROJECTS

Theft Alarm: Anti-Theft Guard Developed a mobile security utility that detects device movement, charging cable disconnection and pocket removal and triggers an alarm. Implemented motion detection, configurable sensitivity, PIN-based protection, multiple alarm modes and offline operation.

Link <https://apps.apple.com/us/app/theft-alarm-anti-theft-guard/id6787492253>

KPSS GO: Soru ve Konu Anlatım Developed a comprehensive mobile application for KPSS exam preparation, featuring question banks, audio lessons, practice tests, progress tracking, saved questions and a Pomodoro study system. Designed and developed the application with a focus on user experience, educational content delivery and subscription-based premium features.

Link <https://apps.apple.com/us/app/kpss-go-soru-ve-konu-anlat%C4%B1m/id6746972924>

İngilizce Öğren Pratik Yap Developed a gamified English learning application covering vocabulary and daily English practice from A1 to C2 levels. Implemented timed learning sessions, vocabulary matching games, pronunciation support, active recall exercises, daily streaks and progress-oriented learning features.

Link <https://apps.apple.com/us/app/i-ingilizce-%C3%B6%C4%9Fren-pratik-yap/id6778374680>

Notishine Developed a personalised motivation and notification application using SwiftUI. Implemented configurable notification schedules, active hours, personalised motivational messages, notification previews and custom daily notification settings.

Link <https://apps.apple.com/us/app/notishine/id6742649551>

Medication Tracking & Reminder Developed a mobile medication management application using SwiftUI. Implemented medication scheduling, dosage and frequency management, recurring reminders and priority-based notifications to help users manage their medication schedules.

Link <https://apps.apple.com/us/app/medication-tracking-reminder/id6745835442>

Speaker Cleaner Water Remover Developed a mobile utility application that uses audio frequencies and device vibration to help remove trapped moisture and dust from smartphone speakers. Implemented frequency-based cleaning modes and a simple user interface focused on fast device maintenance.

Link <https://apps.apple.com/us/app/speaker-cleaner-water-remover/id6746083491>

Cooka – AI Recipe Generator Developed an AI-powered recipe generation application that creates personalised recipes based on ingredients provided by the user. Implemented AI-based recipe generation, favourites and step-by-step cooking instructions, with a focus on personalised content generation and user experience.

Link <https://apps.apple.com/us/app/cooka/id6738347469>

Sleep Sounds Plus Developed a mobile sound-mixing application focused on sleep, relaxation and ambient audio. Implemented a custom sound experience combining different noise types and environmental sounds such as brown noise, white noise, pink noise, rain and fan sounds.
